Helping You to Conserve Energy

I Introduction

Green & Energy Audit was undertaken at Anand Vishwa Gurukul Collage, Next to Mittal Park, Raghunath Nagar, Wagle Estate, Thane West – 400604, during the month of December 2023.

The organization is very keen to promote green culture wherever possible, as a commitment towards better environment and conservation of energy. A lot of efforts have already been put up to bring down the carbon footprint. To further optimize consumption and identify saving opportunities, M/s Senergy Consultants was assigned to carry out Green & Energy Audit of the premises.

This Audit Report presents the analysis of the data collected, observations made at the facility and is governed by the objectives, scope of work, methodology etc. discussed in the ensuing paragraphs.

Team:

The team members of the audit study.

- Mr. Ravindra Datar
- Mr. Nitesh Kharche
- Mr. Chaitanya Rakh

Acknowledgment:

We wish to express our gratitude towards Dr. Harshala Likhite (Principal) for having given us the opportunity for conducting the study and the support provided during the study.

we are also thankful to Mr. Vikas Sakharkar (Clerk) for extending the necessary help and co-operation from their side.

II Executive Summary

The premises were evaluated against the various criteria laid down by the National Assessment and Accreditation Council (NAAC). The major observations are.

Air Quality & Ventilation

- The classrooms and other area are well ventilated to ensure proper air quality.
- The fans are appropriately installed to ensure proper air circulation.
- The outdoor plants have been provided to improve the environment.
- The air-conditioned rooms are provided with proper ventilation and fresh air.

Lighting System

- The usage of natural light is optimized through well designed structure and windows.
- Most of the lights are replaced with Energy Efficient LED lights. The conventional tube lights operating for longer period should be replaced with energy efficient LED lamps.
- It is suggested to automate switching of lamps in the common areas and washrooms with sensor-based control.

Green Campus Initiative

- The movement of vehicle inside the campus is restricted with vehicles of staff and special dignitaries are allowed to enter the campus till designated parking area.
- The usage of plastic is almost banned inside the campus.
- The campus is surrounded with a lot of greenery, trees, and proper landscaping.
- Pedestrian friendly pathways have been constructed for easy movement inside the campus.
- The college has internal committee for conservation of resources like energy, water.
- The student participation may be encouraged in such activities through student clubs and groups.

Environment & Energy Initiative

- Green & Environment based seminars were organized within the college campus.
- Tree Plantation drives was undertaken by students and staff members.

Water Quality & Conservation

- The water is supplied by the Municipal corporation, which is a common practice in Mumbai, Thane & Navi Mumbai.
- Water purifiers & coolers are provided at convenient locations and on each floor.
- The toilets are provided with water efficient (low usage) fittings.
- The distribution network and piping are satisfactory and adequate.

Waste Management

- The effluent water is discharged in the municipal drain, which is a common practice in and around Mumbai, Thane & Navi Mumbai.
- The organic waste is segregated and disposed through municipal waste management system.
- There is no hazardous or medical waste generated in the college.
- The electronic gadgets / waste is either donated if useful or handed over to appropriate waste collectors.
- The general solid waste is disposed through municipal corporation.

Air Conditioning System

- The Air Conditioners are operated as required with manual control. The operation is minimal consequently automation may not be economical.
- The room temperature is maintained at 24 to 25 °C, which is well within the recommended values.
- The Air Conditioners are serviced regularly and properly maintained.
- Most of the Air Conditioners units are energy efficient with star rating of 3 and above.

Infrastructure usage

- The draining system for washrooms is efficient and effective
- There is adequate fire extinguishers located at key areas.
- There were no seepages observed in the building premises.
- The on-campus movement is distributed with multiple entrances as well as staircases.

Green IT culture

- The Energy efficient computers and laptops have been procured.
- The electronic communication is encouraged to minimize usage of papers.
- Most of the papers are reused for doubled sided printing to further minimize usage of paper.

Renewable Energy

- The possibility of installing Solar Photovoltaic System with NET metering may be assessed to meet part of the electricity consumption.
- The quantity of plate waste (organic waste with higher starch contents) is negligible, consequently, there is no potential for biogas generation.
- There is no application of solar thermal system and does not find attractive in this case

III Electrical Gadget

Lamps:

- The illumination level is generally as per the norms; the illumination level is higher mainly due to usage of day light.
- Most of the lights are replaced with Energy Efficient LED lights. The conventional tube lights operating for longer period should be replaced with energy efficient LED lamps.
- The lamps are strategically located to optimize usage of day light.
- The use of daylight has been maximized through windows.
- The practice of switching off the lamps in the unoccupied areas has been followed.

Ceiling Fans:

- The fans are switched off, when not in use.
- It is suggested to procure energy efficient fans with High Efficiency Fans with BLDS Motors / or fans with 5-star rating while making new purchases.

Air Conditioners:

- The air conditioners are switched off, when not in use.
- The temperature is maintained at 24 to 25 °C for air conditioning spaces, which is within the recommended values.
- The Air Conditioners are operated as required with manual control. The operation is minimal, consequently automation may not be economical.
- The overall condition of indoor as well as outdoor units is satisfactory.
- The Air Conditioning Units have star rating of 3 & above, which intrinsically operate at high energy efficiency. It is suggested to procure energy efficient machines of 5-star rating while making new purchases.

Electricity Bill:

The power cost and consumption are within the normal range.

The drains from the washrooms are connected to the municipal drainage, which is a common practice in the colleges in and around Mumbai.

The municipal corporation charges for water disposal.

Seepage in the building:

The premise was visually inspected for seepages.

No seepages were observed in any of the places.

Parking Area:

There is adequate parking space for vehicles/four wheelers. However, almost all the students and many of the faculty members avail public transport system which is very convenient due to proximity to railway station and bus services.

VIII Green Culture

Computers/Laptops:

1. The LED / LCD monitors & Laptops has been procured, which are energy efficient.
2. These monitors are not only energy efficient but also generate minimal heat and cut down on air conditioning load.

The following steps may be initiated to further enhance efficiency of the systems.

1. An efficient power management system may be incorporated to
 - a. Switch off the display if not in use.
 - b. Put the computer in Sleep mode / switching off the machines, if not used for prolonged period.
2. Optimize brightness of the screen.
3. Discourage use of screen savers, which has similar power consumption.

Paper-less communication:

The major internal as well as external communication is through electronic medium.

Re-using one sided paper for printing:

It was observed that two side printing / printing on the back side of used paper in more than 80% of the cases.

IX Renewable Energy

Solar Photovoltaic:

It is suggested to install rooftop solar panels with net metering for captive usage.

Solar Thermal:

There is no application of solar thermal system and does not find attractive in this case.

Biogas Plant:

There is no possibility of installing biogas plant for cooking as the quantity of plate waste is negligible.
