Maintenance of Water Bodies and Distribution System in College:

There are two (2) water tanks on the ground floor each having storage capacity of 5000 litres and one (1) water storage tank on the top floor, having storage capacity of 2000 litres, which are used for the storage of water supplied by the Corporation. From these tanks, water is supplied throughout the entire building.

Both the underground water tanks and storage tanks at the top are cleaned. Each tank takes three days to clean with water and potassium permanganate. The dirty water is thrown out and this process is repeated 2-3 times. Water tanks are unlocked only for the process of cleaning, otherwise the water tanks remain locked.

Ground Level Water Tank- 5000 litres each
